

## Silicon Labs Wins Elektra Fabless Semiconductor Supplier of the Year Award 2010

December 20, 2010 1:00 PM EST

AUSTIN, Texas--(BUSINESS WIRE)-- [Silicon Laboratories Inc.](#) (NASDAQ: SLAB), a leader in high-performance, analog-intensive mixed-signal ICs, has been named "Fabless Semiconductor Supplier of the Year" at the annual Elektra Awards 2010, announced at the awards gala held at the Lancaster Hotel in London on Dec. 9.

The Elektra Awards, founded by *Electronics Weekly* magazine, recognize the achievements of individuals and companies in the electronics industry. The Elektra Fabless Semiconductor Supplier of the Year Award is bestowed upon a company that has demonstrated significant commercial success for new product introductions and specific product intellectual property developments during the year.

"This year's shortlist includes a strong array of technology-focused businesses, and the winner typified this in its particular area of semiconductor products," said *Electronics Weekly* editor-in-chief Richard Wilson, a member of the Elektra judging panel.

"Winning the Elektra Fabless Semiconductor Supplier of the Year Award is an honor, and we appreciate the recognition of the success of our mixed-signal strategy in the global electronics industry," said Necip Sayiner, president and CEO of Silicon Laboratories. "We look forward to launching next-generation products and taking advantage of new market opportunities in the coming year."

Silicon Labs' diverse portfolio of patented silicon solutions includes mixed-signal microcontrollers (MCUs), touch-sense MCUs, infrared/ambient light sensors, AM/FM radio tuner ICs, video demodulators, silicon TV tuners, sub-GHz wireless ICs, embedded modems, subscriber line interface circuits, precision clock ICs, crystal and silicon oscillators, digital isolators, isolated gate drivers, current sensors and Power over Ethernet controllers.

### Silicon Laboratories Inc.

Silicon Laboratories is an industry leader in the innovation of high-performance, analog-intensive, mixed-signal ICs. Developed by a world-class engineering team with unsurpassed expertise in mixed-signal design, Silicon Labs' diverse portfolio of patented semiconductor solutions offers customers significant advantages in performance, size and power consumption. For more information about Silicon Labs, please visit [www.silabs.com](http://www.silabs.com).

### Cautionary Language

This press release may contain forward-looking statements based on Silicon Laboratories' current expectations. These forward-looking statements involve risks and uncertainties. A number of important factors could cause actual results to differ materially from those in the forward-looking statements. For a discussion of factors that could impact Silicon Laboratories' financial results and cause actual results to differ materially from those in the forward-looking statements, please refer to Silicon Laboratories' filings with the SEC. Silicon Laboratories disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
