Silicon Labs (NASDAQ: SLAB) is a leader in secure, intelligent wireless technology for a more connected world.

- Focus on large & growing markets
- Robust breadth and depth of protocols & ecosystems
- Strong & sustainable growth, highly attractive target model
- Channel revenue >80% of total revenue

Headquartered in Austin, Texas, with ~2,000 employees, creating a global perspective that is an integral part of our culture.

For complete information regarding Silicon Labs’ financial results, please visit https://investor.silabs.com/financials/financial-reports/default.aspx
Integrated hardware and software platform – supporting more wireless protocols than anyone in the industry – for industrial, commercial, home and life applications, reaching tens of thousands of global customers.

### Recent Business Highlights

**In Q3 2022,** we were recognized for excellence as a supplier by three customers. Awarded Cisco’s Emerging Supplier of the Year, recognizing Silicon Labs for demonstrating excellence in all of Cisco’s core performance areas. Named as a finalist for Acuity Brands’ Supplier of the Year award and commended for our strong partnership during a challenging year. Named Collaborator of the Year and a Supplier of the Year award and commended for excellence in all of Cisco’s core performance areas. Named as a finalist for Acuity Brands’ Supplier of the Year and a Supplier of the Year award and commended for our strong partnership during a challenging year.

Hosted the third annual virtual Works With Conference, which drew more than 7,000 registrants from over 1,600 unique companies, signing up for 67,000 individual sessions.

At Works With Conference, announced several new products, including the expansion of the Series 2 SoC family: Complete Matter development solutions; Silicon Labs Pro Kit for Amazon Sidewalk, the first end-to-end development platform for Amazon Sidewalk with complete connectivity support; FG25 SoC and EFF01 Front End Module (FEM), a new flagship SoC and power amplifier for Wi-SUN; SiWi917, Silicon Labs' first Wi-Fi 6 and Bluetooth LE combination SoC in the industry.

In Q4 2022, the Connectivity Standards Alliance (CSA) announced the release of Matter 1.0, the application layer protocol developed specifically to address device interoperability within the smart home. Silicon Labs is the leading semiconductor company code contributor to Matter, and as of the end of 2022, claims 86% of Matter over Thread’s industry certifications. Silicon Labs has become a one-stop resource for Matter devices, border routers, and bridges so developers can easily bridge Matter to other IoT development platforms like Wi-Fi, Zigbee, Thread, and Z-Wave while leveraging their experience with Silicon Labs hardware and tools.

In Q1 2023, Silicon Labs announced a new integrated circuit family designed for the smallest form factor IoT devices: the xQ27 family of Bluetooth SoCs. The xQ27 family offers IoT device designers the energy efficiency, high performance, security, and wireless connectivity ideal for tiny, battery-optimized devices like connected medical devices, wearables, asset monitoring tags, and smart sensors.

**Strategic Deployment of Capital is a Priority**

Since 2007, Silicon Labs has become a one-stop resource for Matter devices, border routers, and bridges so developers can easily bridge Matter to other IoT development platforms like Wi-Fi, Zigbee, Thread, and Z-Wave while leveraging their experience with Silicon Labs hardware and tools.
