Investor Fact Sheet

All information is current as of 7/26/2023 unless otherwise noted

Silicon Labs (NASDAQ: SLAB) is a leader in secure, intelligent wireless technology for a more connected world.

- Focus on large & growing markets
- Robust breadth and depth of protocols & ecosystems
- Strong & sustainable growth, highly attractive target model
- Channel revenue ~80% of total revenue

Headquartered in Austin, Texas, with ~2,000 employees, creating a global perspective that is an integral part of our culture.

Recent Business Highlights

In Q4 2022, the Connectivity Standards Alliance (CSA) announced the release of Matter 1.0, the application layer protocol developed specifically to address device interoperability within the smart home. Silicon Labs is the leading semiconductor company code contributor to Matter, and as of the end of 2022, claims 86% of Matter over their AQ27 family of Bluetooth SoCs. The AQ27 family offers IoT device designers the energy efficiency, high performance, security, and wireless connectivity ideal for tiny, battery-optimized devices like connected medical devices, wearables, asset monitoring tags, and smart sensors.

Announced general availability for our flagship FG25 sub-GHz SoC. The FG25 is ideal for long-range, low-power communications, capable of broadcasting more than 1km with minimal data loss in dense, urban environments. With Wi-SUN certification, the FG25 also supports high data bandwidth of up to 3.6 Megabits per second, which is critical for enabling the large networks needed by smart cities. In Q2 2023, we announced the new dual-band FG28 SoC, designed for long-range networks and protocols like Amazon Sidewalk, Wi-SUN, and other proprietary protocols. The FG28 includes radios for sub-Gigahertz (Ghz) and 2.4 Ghz Bluetooth LE, making it particularly attractive for edge applications in growth areas like smart agriculture, smart cities, and neighborhood networks. The built in AI/ML accelerator is a first for a sub-GHz SoC, bringing AI/ML to the edge. Held the grand opening of the Silicon Labs Connectivity Lab in our Boston site, an event attended by top customers and partners. The Connectivity Lab simulates a modern Smart Home, with a range of IoT platforms like Wi-Fi, Zigbee, Thread, and Z-Wave while leveraging their experience with Silicon Labs’ hardware and tools.

Silicon Labs announced the availability of its Pro Kit for Amazon Sidewalk, which has been developed to simplify the development process, reduce costs, and accelerate time to revenue for Amazon Sidewalk devices. As one of Amazon Sidewalk’s only three qualified hardware partners for developing Amazon Sidewalk devices, our Pro Kit provides all the necessary tools for developing high-volume, scalable IoT applications. It is also designed to support the development of wireless IoT-based devices on Bluetooth and sub-GHz wireless protocols for Amazon Sidewalk. The Pro Kit for Amazon Sidewalk was also recently awarded Embedded Computing Design's Best in Show Award at the Embedded World Conference in Nuremberg, Germany, in March.

In Q2 2023, Silicon Labs announced a new integrated circuit family designed for the smallest form factor IoT devices: the xG27 family of Bluetooth SoCs. The xG27 family offers IoT device designers the energy efficiency, high performance, security, and wireless connectivity ideal for tiny, battery-optimized devices like connected medical devices, wearables, asset monitoring tags, and smart sensors.

By end of 2022, Silicon Labs has become a one-stop resource for Matter devices, border routers, and bridges so developers can easily bridge Matter to other IoT development platforms like Wi-Fi, Zigbee, Thread, and Z-Wave while leveraging their experience with Silicon Labs’ hardware and tools.
